Business 28
Construction Update

Dear Property Owners:

As Spring is now upon us and asphalt plants will soon re-open for the season, contractor Barrett Paving Company is scheduled to resume roadway construction on Business 28 beginning on Monday, April 2nd, 2012. Crews will resume work from Cinema Drive and will continue to progress westward to SR 28. The return of these construction activities means that a couple of necessary road closures will also be returning soon.

Cinema Drive will be closed at Business 28 from April 2nd thru May 4th, 2012 as crews work to reconstruct the intersection area. Traffic will be detoured via Montclair Blvd. **Business 28** will remain open to **2-way** traffic throughout the remainder of the project, though the number of lanes will be reduced to just one in each direction.

Sometime after Cinema Drive reopens, Montclair Blvd will be closed at Business 28 for the same purpose and for a similar duration. The exact dates of the closure will be posted at the intersection in advance.

It is our intent to continue to keep area businesses, residents, and the traveling public up to date during the various construction phases of this project. Future closures or changes to the traffic pattern will be announced via signage along Business 28, through news releases to the media, and notices as well as additional information will always be available on the TID website at www.tid.clermontcountyohio.gov.

Our project inspector, Shane Garr, continues to be on site each day to monitor the contractor's activities and to help coordinate various aspects of the project. You may direct any questions to Shane Garr at 513-479-2562 or to our traffic engineer, Jeremy Evans, at 513-732-8878.

We thank you in advance for your cooperation once again during the upcoming construction season. Your patience will be rewarded with a safer and less congested roadway.

Sincerely,

A handwritten signature in blue ink that reads 'Patrick J. Manger'.
